SGBC LUNCH AND LEARN

SGBC Lunch and Learn with C&W Services:

Enabling Data-Driven Building Operations with Open Architecture BMS

Friday, 2 October 2026 | 11:30AM - 2:00PM | In-Person Event

The evolving real estate and facilities management landscape is driving greater demand for connected, energy-efficient and data-driven building solutions.

This Lunch and Learn session, powered by SGBC Founding Member C&W Services, will explore emerging trends and opportunities in building operations, and how open platforms and connected technologies can support more efficient and sustainable building management. The session will examine how open building systems, connectivity and data integration can enable more informed decision-making, including the role of the

Niagara Framework® in connecting diverse devices, systems and operational data. It will also explore T1L retrofit solutions for modernising building systems through cyber-secure IP networks, auto-commissioning and standards-based control strategies, highlighting opportunities to improve operational efficiency, strengthen cybersecurity and unlock data-driven building performance with less disruptive infrastructure upgrades.
