

SGBC WEBINAR

SGBC Webinar:

Powering Progress - Energy Storage Systems in Singapore's Built Environment

Friday, 9 October 2026 | 3:00PM - 4:30PM | Zoom Webinar

As Singapore's built environment accelerates its push toward whole-lifecycle sustainability, the reliance on legacy diesel generation for temporary construction and production sites remains a critical hurdle. This SGBC Webinar explores the transformative potential of Mobile Battery Energy Storage Systems (BESS) as a viable, cost-effective alternative to conventional diesel power.

Join us as we delve into a comprehensive industry report, co-developed by the Energy Studies Institute, Singapore Green Building Council and Infinity Cube, that highlights how integrating mobile BESS - specifically utilising stable Lithium Iron Phosphate (LFP) chemistry - can slash diesel consumption, eliminate peak load stress, and dramatically reduce operational costs. We will examine empirical

EVENT DETAILS

Friday, 9 October 2026

3:00 PM - 4:30 PM

Zoom Webinar

Event Fees (w/ GST)

SGBC Member: \$20

GMA/GMAP/GMAAP: \$20

Non-Member: \$50

evidence from local deployments, discuss the regulatory landscape, and outline strategic recommendations for scaling adoption across the value chain.

Key Learning Objectives:

- **Understand the Value Proposition:** Discover how mobile BESS decouples power generation from erratic peak-load machinery, delivering significant reductions in Levelised Cost of Energy (LCOE) and carbon emissions.
- **Review Real-World Case Studies:** Gain insights from empirical data on local deployments
- **Navigate Regulatory Pillars:** Understand the established frameworks required for successful deployment, including grid interconnection (SS 650), environmental standards (TR 77), licensing via LEWs and QPs, and SCDF fire safety guidelines.
- **Overcome Market Friction:** Address common barriers to adoption, such as upfront cost perceptions and technical unfamiliarity.

Attendees will walk away with a clearer understanding of the commercial and environmental business case for mobile BESS, practical knowledge on navigating regulations, and actionable strategies to implement these systems in their own projects.
