AHRI recently published the updated, approved standards, *AHRI 550/590 (I-P) and 551/591 (SI): Performance Rating of Water-chilling and Heat Pump Water-Heating Packages Using the Vapor Compression Cycle*.

We'll organize a short (45-min) webinar next Wednesday (Nov 11) to share and discuss these changes with our members and the consulting engineering community who are involved with chiller-related projects, including for data centers (DCs).

Would this be of interest to ACES and your members? If yes, we're happy for you to join us (no cost to participate). My apologies for the short notice. We recently published the standard and wanted to share the updates in a timely way.

The Zoom registration link: https://ahrinet-org.zoom.us/webinar/register/WN_FS3BVRQ0TaCBtVydYAmgBg

We are upgrading a number of our standards so that AHRI-certified chillers (and other HVACR equipment) can better meet the robust requirements of the DC industry in Southeast Asia and globally.

Summary of those key changes:

1. Updated Table 5, *Full and Part-load Application Rating Conditions*
2. Temperature ranges (including leaving temps) increased to include data center applications.
3. Added exclusions to Section 5.4.1.2 NPLV.IP
4. Updated Table 8, Published Values

Attached:

1. AHRI Southeast Asia deck with the latest DC standards/cert program updates
2. *AHRI 550/590-2026 (I-P)*
3. *AHRI 551/591-2026-2 (SI)*
4. *Stand-alone Appendix H-0B/1B-2026 of AHRI Standard 551/591 (SI)*

Full certification program information is available on our website.

Webinar details:

- **Date/time**: **Nov 11 (Wed), 09:30-10:15 Singapore time**
- **Speakers**: **Bridge Xue**, AHRI Vice President of Global Operations
  Jenny Zhang, Senior Manager, AHRI China
- **Registration link**: https://ahrinet-org.zoom.us/webinar/register/WN_FS3BVRQ0TaCBtVydYAmgBg

Feel free to share this e-mail with your members as appropriate.

Thank you and to ACES for your consideration and support.

Best wishes,

---Dom
