Singapore Government emails are sent from .gov.sg addresses

Dear Industry Professionals,

The Building and Construction Authority (BCA) was informed of a data breach incident that occurred between 3 to 6 November 2026, on the content management system (CMS) of the user testing environment for the CORENET X Website.

We regret to inform you that your email address, which was maintained for email subscription purposes in the CORENET X Website, may have been obtained without authorisation in the data breach incident.

We apologise for the data breach and would like to assure you that immediate measures have been taken to contain the incident, including restricting access to the affected information. We are also taking the necessary steps to prevent any further incidents. In addition, we have reported the incident to the relevant authorities for investigation. Checks on other BCA systems, including the CORENET X Submission Portal, confirm that they are not affected by the breach.

We urge you to remain vigilant against potential phishing attempts and scams, particularly any suspicious emails or messages requesting personal information.

BCA takes a serious view of this incident, and we will be putting in place additional measures to enhance the security of data in our systems. If you require further assistance on this matter, please reach out to us via our feedback form (https://www2.bca.gov.sg/feedback/).

Thank you.

Regards

Derek Ang
Deputy Group Director (Building Plan and Management Group)
Director (CORENET X Project Office)
Building and Construction Authority

This is an official communication from BCA.
