COVID-19
Now & Surviving the Future
- A roadmap for SME legal rights

SMEs have been affected badly by COVID-19 in first half 2020 with manufacturing, engineering and construction suffering from contract issues, cashflow problems and tenancy disputes. This webinar provides a walkthrough for SMEs through the COVID-19 (Temporary Measures) Act to discuss both the temporary and permanent reliefs provided, how contract obligations might be deferred to be disputed at a later time and how to protect SME rights and survivability for the future from a legal perspective when temporary reliefs end in third quarter 2020.
