

Personal Nuggets of Challenges in Engineering Project Developments

Speaker: Mr MOH Wung Hee

Urban Development Consultant

Patron: Prof CHAM Tao Soon

Founding President of NTU

SINGAPORE, 70m underground

Synopsis

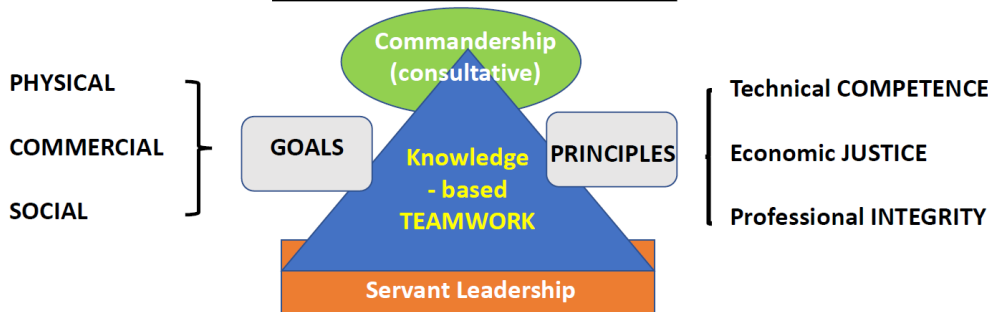

In this talk, Moh will share some personal nuggets of challenges experienced in his engineering project developments, with reference to which he will discuss his notion of success enablers for engineering project developments, as encapsulated below.

Nuggets will be drawn from his experience as engineering lead in two projects: (1) a Singapore’s project – development of the Changi Water Reclamation Plant of the global award winning DTSS Phase 1. (2) a China’s project – development of infrastructure for the Start-up Area (township’s central zone) of the well acclaimed Guangzhou Knowledge City. In respect of privacy and confidentiality, however, he shall avoid mention of other entities (except the project owners) involved in these projects.

About the Speaker

Moh Wung Hee is an international Urban Development Consultant and Water Resources Specialist, with some four decades of experience in Singapore, China, and India. He has held senior management and professional leadership positions in both public and private sectors, having planned and implemented well over US\$10 billion of infrastructure projects for urban developments. He is now on freelance since 2020. Moh graduated with BEng (1st Class Honours) & MSc from NUS Singapore. He is Fellow of internationally accredited engineering and ADR institutions (FIES, FICE, FSI Arb, FCI Arb).

HOLISTIC MODEL OF SUCCESS ENABLERS for engineering project development
